

Capture All of ETH

CoinDesk Ether Total Return Index (ETXTR)

ETXTR is a total return ETH benchmark to help capture the comprehensive investment case for Ethereum, including ETH's staking yield. The index reflects the performance of a position in staked ether, comprising the daily price return of ether plus the daily rewards earned from the Ethereum network.

The index is a blend of the CoinDesk Ether Price Index (ETX), the largest ether price benchmark by AUM, and CESR™ the Composite Ether Staking Rate, the institutional-grade benchmark for Ethereum validators.

CoinDesk Ether Total
Return Index (ETXTR)

=

CoinDesk Ether
Price Index (ETX)

+

CESR™ the Composite
Ether Staking Rate

ETXTR uses the CoinDesk Ether Price Index (ETX) to measure the daily price return of ether and CESR to measure the daily yield from staking.

ETX provides a USD-denominated reference rate for the spot price of Ether (ETH). The index leverages real-time prices from multiple constituent exchanges to provide a representative spot price.

CESR captures all relevant rewards to Ethereum validators, including consensus rewards and total priority transaction fees. The methodology accounts for deposits, withdrawals, and penalties. Historical daily CESR is administered by CoinFund and is calculated by CoinDesk Indices.

ETXTR and ETX Historical Values
