POLKADOT
The Polkadot network’s mainnet went live last year. This year, the network is expecting to realize its scalable multi-chain architecture. Join this session for a look at the interoperability at the heart of the project.

NEAR PROTOCOL
The NEAR Protocol is built with usability and developer experience in mind. We empower Builders and Creators to innovate and engage communities in the next generation Creator Economy. Users don’t need crypto or a wallet to get started - join this session to learn more.

AVALANCHE
Avalanche launched in September 2020 and has rapidly established itself as a leading layer-1 for DeFi. In this session, learn more about the project, its priorities, and what to watch for this year.

POLYGON
Polygon (formerly Matic) has emerged as the premier Layer2 scaling solution on Ethereum as DeFi platforms, NFT marketplaces and metaverses migrate to the platform in search of less congestion and lower fees. Hear from various projects building on Polygon and learn how to leave high gas fees in the dust.

ETHEREUM: EXECUTION LAYER
Layer 2 solutions to Ethereum’s scalability issues are gaining traction as DeFi and NFTs continue to explode. In this session, learn what’s happening at the execution layer on the second largest cryptocurrency network by market cap.

ETHEREUM: CONSENSUS LAYER
No doubt, Ethereum is the blockchain of vast innovation and that’s definitely displayed the network’s scalability hurdles. Join Ethereum builders and enthusiasts as they discuss what’s happening at the consensus layer, especially the transition to Eth2 coming soon.

SOLANA
Solana is one of the fastest growing blockchain ecosystems. In this session, learn about its rapid growth, how to participate and what’s ahead.

CHAINLINK
Join Chainlink’s Sergey Nazarov as he discusses the ways in which oracle networks will soon expand beyond data delivery and into the world of computation.

BITCOIN CORE
The OG cryptocurrency has found its place as an impressive store of value, eclipsing $60k per coin in recent months. From privacy upgrades to scalability enhancements, get an update on Bitcoin’s underlying tech.

BITCOIN LAYER2
Join the projects looking to build businesses on top of Bitcoin. From the lightning network to DeFi protocols, Bitcoin is becoming more than just a store of value with these engaging user experiences.

BINANCE SMART CHAIN
Binance Smart Chain has taken the crypto community by storm. Everyone wants to understand how to participate in the exchange’s blockchain and figure out whether it is an Eth killer.

DAOs
Decentralized autonomous organizations - AKA: DAOs - are one of the key innovations in the blockchain space. Join DAO luminaries as they discuss the projects that are gaining traction and what’s next for the technology.

AAVE
One of the most popular DeFi protocols, Aave launched in January 2020 and has already surpassed $5B in deposits and borrowings. Hear the story of its meteoric growth, learn what’s next and even get hands on with building.

FLOW
CryptoKitties, NBA Top Shot and Flow — Join Dapper Labs as they discuss the path to the next billion users, technical updates and future momentum for the scalable blockchain.
